Art Unit: 2829

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 - 32, drawn to measuring device for electric motor, classified in class 324, subclass 772.
  - II. Claims 33 - 57, drawn to a method of measuring electric motor, classified in class 324, subclass 117r.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method of measuring electric motor can be practiced with different kind of measuring device.

3. A telephone call was made to Barry R Lipsitz on 7/20/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim
